PROFESSIONAL SUMMARY

Computer Science and Engineering student with hands-on experience building and deploying full-stack web applications, REST APIs, and database-driven software solutions. Strong foundation in programming, data structures, algorithms, and problem solving, with practical experience using Python, JavaScript, C++, React, FastAPI, and PostgreSQL. Passionate about software development and continuously building practical skills across modern technologies.

TECHNICAL SKILLS

Languages Python · Java · C++ · C · JavaScript	**Frontend** React · Bootstrap · Tailwind CSS · HTML/CSS · Axios	**Backend** FastAPI · SQLAlchemy · Pydantic · JWT · REST APIs
Databases PostgreSQL · SQLite	**Deployment** Vercel · Render · Netlify · GitHub Pages	**Tools** Git · GitHub · Postman · VS Code · Docker (Basics)

FEATURED PROJECTS

Swift Logistics — Full-Stack Parcel Management System

React, FastAPI, PostgreSQL, SQLAlchemy, JWT • Solo Project

- Built a parcel booking and delivery-tracking platform with admin approval workflow and JWT-based authentication.
- Implemented public parcel tracking, search, filtering, sorting, pagination, and CSV export.
- Added Bangladesh location hierarchy (District → Upazila → Thana); deployed frontend on Vercel and backend on Render.

■ github.com/Khalid635/swift-logistics-frontend • github.com/Khalid635/swift-logistics-backend

Expense Tracker API — RESTful Backend Service

FastAPI, SQLAlchemy, Pydantic, PostgreSQL, JWT • Solo Project

- Built a REST API for personal expense management with JWT authentication and role-based access control.
- Implemented Pydantic validation, centralized error handling, and interactive OpenAPI documentation.

■ github.com/Khalid635/expense-tracker-api

CocktailHub — React Frontend Application

React, Bootstrap, Axios • Solo Project

- Built an interactive cocktail recipe and ingredient discovery application with responsive, mobile-first design.
- Implemented component-based architecture and REST API integration for live recipe data.

■ precious-stardust-8f606c.netlify.app

Movie Collection API

Python, REST API • Solo Project

- Built a REST API for organizing a personal movie collection with full CRUD functionality.
- Implemented consistent request and response structures for managing movie records.

EDUCATION

Presidency University B.Sc. in Computer Science & Engineering (Honours) · 2025–2029 · Expected 2029	**CGPA 3.70**
Relevant Coursework: Web Development, Algorithms, Data Structures, Software Engineering	
Phitron — Programming & Problem Solving Track Fall 2025–2026 · First two semesters · C, C++, Data Structures & Algorithms	**CGPA 4.0** **PHDSA-077495031504**
Demra Ideal College — HSC, Science · 2024	**GPA 4.67**
Darunnazat Siddiqia Kamil Madrasha — SSC, Science · 2022	**GPA 5.00**

COMPETITIVE PROGRAMMING

Codeforces — Active problem-solving practice focused on algorithms, data structures, and optimization.

LANGUAGES

Bangla: Native • **English:** Professional Working Proficiency • **Hindi:** Conversational

PROFESSIONAL EXPERIENCE

Web & Parcel Operations Assistant

Parcel Delivery Operations · Dhaka, Bangladesh

- Managed parcel records through a web-based system, including adding, updating, and deleting parcel information.
- Maintained customer and shipment data throughout delivery.
- Monitored parcel statuses and followed up on delivery progress to confirm successful customer delivery.
- Supported day-to-day web-based parcel data management with accuracy and consistency.
